-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 16 September 2008.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 16, 2008 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Jomeus (U.S. Patent No. 6,196,842).

Jomeus discloses a bone screw having a screw head, shank and a thread formed on the screw shank of a plurality of turns characterized in that starting from the free end of the screw shank towards the head, a first screw thread portion with a smooth cutting edge extending toward the screw head, comprising three turns, a second screw thread portion extending from the first screw thread toward the screw head and is formed in its cutting edge with recesses. The recesses of the second screw

thread portion relative to the angular length in circumferential direction are increased compared to the second screw thread from the free end because the screw gets wider in diameter. There is also a third screw thread extending from the second screw thread, which has recesses. The second screw thread and in the third screw thread every 360 degrees three recesses are formed (see Figure 2). The recess extends as a chord toward the screw shank from the cutting edges of the second screw thread portion and of the third screw thread portion and joins in an arc again the cutting edge. The screw shank is considered to be in cylindrical and tapered form (see Figure 1 below).

### ***Response to Arguments***

The amendments filed on September 16, 2008 do not overcome the prior art. The definition of turns is not clearly defined. Each turn is interpreted by the examiner as every one degree of change with respect to a tangential line is considered a turn (e.g. one revolution of a screw has 360 turns). It is recommended that this term be further defined in the claim. It is also suggested to further define the recess. (i.e. Describing it in a way to explain that the thread has a certain width extending from a shaft of the screw, and the recess having a depth that does not reach the shaft and wherein the second and third screw portions have three recesses formed every 360 degrees.)

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL J. ARAJ whose telephone number is (571)272-5963. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
